

9 August, 2018

Attn. Secretary General
Mayors for Peace
Japan

Dear Sir,

First, we hope that this letter will find you and the people of Japan well, prosper and peaceful.

We, at Nablus Municipality in Palestine, are jointly commemorating the Hiroshima and Nagasaki disaster with your delegates from Earth Caravan for Peace and Justice. It was unforgettable catastrophe when both cities experienced a disastrous repercussions among local population resulted in the nuclear bomb dropped on both cities in 1945. We all fully aware that consequences were extremely harsh, destroying the infrastructure of the cities, and most importantly, on people who are still suffering health impairments till present time.

Today, the Earth Caravan for Peace and Justice along with people and children of Nablus will work together, and share experience through dialogue, arts and music to demonstrate solidarity and togetherness.

We, officials, local citizens, and children of Nablus, call upon the United Nations, policy makers, and Human Rights organizations around the world, to develop policies and establish conventions that would abolish the usage of the nuclear weapons against cities and nations. We in Palestine assure you of our solidarity since we are experiencing most likely similar measures against our people.

May God bless the people of Hiroshima and Nagasaki, and hope that all nations around the world will live in total peace and understanding.

With best regards

Eng. Adly Yaish
Mayor of Nablus
